

Website Pricing Guide - Summerfield Sites

How We Estimate Your Quote

At Summerfield Sites, we believe in fair, transparent pricing-no hidden fees, no upsells, just a solid site for a great price. Here's how your estimate is calculated when you request a quote:

Base Price: \$20

Every website starts with a flat base price of \$20. This covers setup, basic structure, and essential styling for your homepage.

Pages: \$2 per additional page (up to 15 pages total)

Each page beyond your homepage adds just \$2, up to a max of 15 pages total. This includes content like:

- About pages
- Product or service descriptions
- Photo galleries
- Blogs or FAQs

Example: A 5-page site = 4 extra pages = \$8

Functionality: +\$10 (if needed)

Websites with interactive features like:

- Contact forms
- Embedded maps
- Search bars
- Custom code
- Client portals

These require more development time and tools. If your site needs features like this, we add a flat \$10.

Build Preference: +\$3

We can build your site in different ways:

Website Pricing Guide - Summerfield Sites

- Hand-coded for full control
- With visual builders for easier editing
- With AI-assisted tools for quick launch

If you have a preference, we add \$3 to account for extra planning or setup. If you're flexible, no charge here.

Example Quote:

5-page site + forms + preference

\$20 base + (4 x \$2 pages) + \$10 functionality + \$3 preference = \$41

Maximum Estimate: \$50

If your total estimate would go over \$50, we just charge \$50. This cap keeps things simple and affordable.

If your needs go beyond our quote system, we'll talk with you directly about options.

Please note:

This is a ballpark estimate only. Final pricing may shift slightly once we talk through your needs, content, and timeline.

Still, we promise to keep it simple and keep it honest.
